Directive 2002/95/EC (RoHS)

5th February 2013

Dear Sir or Madam,

Since 1900, the HEICO-Group has been providing reliable and high quality solutions in the area of fastening technologies. Quality and continuous improvement are primary elements of our enterprise philosophy and are frequently proven by certification according to DIN EN ISO 9001:2008.

The commitment to environmental compatibility and sustainability is also of prime importance to us. Therefore our HEICO-LOCK wedge lock washers are produced in accordance to the European Union Directive 2002/95/EC on the restriction of the use of certain hazardous substances (RoHS).

The "Directive 2002/95/EC (RoHS) electrical and electronic equipment law (ElektroG) § 5: from the 16th March 2005 including all valid decisions of the Commission for restricting the use of certain hazardous substances", regulates the use of certain hazardous materials in the manufacture of various types of electronic and electrical equipment and their components. The objective of the restriction is to banish those hazardous substances from electrical equipment and to counter environmental pollution in general.

The proven compliance of the HEICO-LOCK wedge lock washers with the Directive 2002/95/EC (RoHS) is confirmed by the TÜV Rheinland.

For further questions or additional information, please contact us.

Best regards
HEICO Befestigungstechnik GmbH
